From edible insects and lab-grown meat to urban farming and local sourcing, the future of our food concerns us all. How should we change our food systems to secure a more sustainable, healthy and fair future? FOOD: Bigger than the Plate engages with the artists, designers, cooks, scientists and farmers who are addressing this global challenge and exploring new ways of connecting us with what we eat. It discusses diverse and creative ways to reimagine food waste, biodiversity, supply chains and social empowerment through the politics and the pleasures of one of life’s single greatest necessities.
